Homesite 241 is the Kennedy plan at Madison at Copper River, a spacious two-story home designed with flexibility in mind. Approaching the home, two separate entrances offer added flexibility. The door to the left leads into the Multi-Gen Suite, which begins with a living or office space with a kitchenette and continues into a private bedroom and full bathroom, making it well suited for long-term or overnight guests. The main front door opens to a hallway with a powder bathroom before expanding into the Great Room and dining area. The dining space connects directly to the kitchen, which features ample counter space, a large center island, and a walk-in pantry. Upstairs, a bonus room offers a versatile area for gathering or entertaining. The hallway leads to the Owner's Suite, complete with an en-suite bathroom featuring dual vanities, a soaking tub, a separate shower, and a spacious walk-in closet. Just outside the suite, the laundry room is conveniently located alongside two linen closets. Bedrooms 2 and 3 complete the second floor, each offering a walk-in closet and shared access to a full bathroom.
